REMARKS	RETURN TO CIA LIBRARY	
25X1		

1. No aircraft were seen at the JUETERBOG-DAMM (N 52/E 68) airfield. Two-hundred Soviet soldiers were training with guns, on the landing field, some of which were emplaced. Three closed trucks were parked near the closed hangars. Two radio masts, about 40 feet high, with a small crossbar at the top, were also seen there. Another closed truck, to which a 55-foot rod antenna was fixed, was standing between the hangars.

2. Forty-two closed railroad freight cars and eighteen coaches were standing on the spur track. Among others, the truck [redacted] was seen at the airfield entrance gate.

Comment:

a. Report confirmed previous information, according to which no air unit is located in JUETERBOG-DAMM. The hangars are said to be converted into workshops of an air force technical unit in charge of repair of radio sets. The observed radio masts and radio trucks are probably assigned to this unit.

b. An army unit is also located at the field.

This document is hereby regraded to CONFIDENTIAL in accordance with the letter of 16 October 1978 from the Director of Central Intelligence to the Archivist of the United States.
